

Advance United

Advance United. Exit Stronger.

INVESTOR PRESENTATION Q2 2022

Disclaimer and Forward-Looking Statements

This Presentation may include certain “forward-looking statements” within the meaning of applicable Canadian securities legislation. All statements, other than statements of historical fact, included herein, including, without limitation, statements regarding future plans and objectives of Advance United Holdings Inc. (“the Company”), future opportunities and anticipated goals, the Company’s portfolio, treasury, timetable to permitting and production and the prospective mineralization of the properties, are forward-looking statements that involve various risks, assumptions, estimates and uncertainties.

Generally, forward-looking information can be identified by the use of forward-looking terminology such as “seeks”, “believes”, “anticipates”, “plans”, “continues”, “budget”, “scheduled”, “estimates”, “expects”, “forecasts”, “intends”, “projects”, “predicts”, “proposes”, “potential”, “targets” and variations of such words and phrases, or by statements that certain actions, events or results “may”, “will”, “could”, “would”, “should” or “might”, “be taken”, “occur” or “be achieved”. There can be no assurance that such statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements. The presentation refers to previous returns received by the Company on the sale of its assets which may not be indicative of future returns from sales of assets. Past performance does not guarantee future results. Forward-looking information is subject to known and unknown risks, including but not limited to: an inability to complete the business objectives; general business, economic, competitive, geopolitical and social uncertainties; delays in obtaining or failures to obtain required governmental, regulatory, environmental or other required approval; the actual results of current exploration activities; the fluctuation of the price of gold and other precious metals; acquisition risks; and other risks of the mining and resource industry. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. These statements reflect the current internal projections, expectations or beliefs of the Company are based on information currently available to the Company. The Company will not undertake to update any forward-looking information, except in accordance with applicable securities laws. The Company believes that the expectations reflected in those forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be correct and such forward looking statements included in this presentation should not be unduly relied upon by investors as actual results may vary. Unless required to be updated pursuant to securities laws, these statements speak only as of the date of this presentation and are expressly qualified, in their entirety, by this cautionary statement.

Although the Company has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, other than as required by applicable law. Accordingly, readers should not place undue reliance on forward-looking statements and trading in securities of the Company should be considered highly speculative. All scientific and technical information contained in this presentation has been prepared by, or under the supervision of, Jim Atkinson, CEO for the Company, a qualified person as defined by NI 43-101 Standards of Disclosure for Mineral Projects. Historical assays contained in this Presentation have not been confirmed by the Company, are of uncertain QA/QC standards and should not be relied upon. They are presented as a guide to future exploration. Last updated June 10, 2022.

Executive Overview

Advance United's business is comprised of three unique integrated layers that complement each other: Au Marketplace, an automated pipeline, and our property portfolio.

1

Au Marketplace

Au Marketplace is an open-source, AI powered, online platform connecting property owners of precious metals, base metals, and rare earth deposits with investors, developers, and producers.

2

Pipeline

Au Marketplace makes prospecting effortless with automated filtering of properties that meet our portfolio's strict criteria from a growing, global supply.

3

Portfolio

The Company's goal is to create a large and comprehensive portfolio of past producing and highly promising gold exploration properties in North America and land bank them. The value of each property that Au acquires is reengineered and evolved into peak value using the latest technology, instruments such as the NI 43-101 reports, and hands-on expertise until it's either sold or partnered for exploitation through mid-tier and major mining companies. Au has no intention of mining itself.

A top down and a bottom up approach.

The engine.

1. Primary data technology platform connecting owners of properties bearing precious metals, base metals, and rare earth deposits with investors, developers, and producers.

Qualifies properties that meet specific criteria, providing owners with a means to increase their property's value through the application of technology and hands-on expertise.

2. Au Marketplace makes prospecting effortless with automated filtering of gold bearing properties that meet our portfolio's strict criteria from a growing, global supply.

3. Each gold-bearing property that Au acquires is continuously evolved into peak value until it is either sold or partnered for exploitation with mid-tier and major mining companies.

We've acquired and are acquiring a portfolio of undervalued gold properties and increasing their value through the application of modern technology, instruments such as NI 43-101 reports, field work, and analysis.

The business.

1. Property owners of mineral commodities and deposits seek a solution to the problem of owning a dormant property with an unestablished value and not having the means to move it forward. Otherwise, their hopes and dreams are dead in the ground. Au Marketplace is the solution.

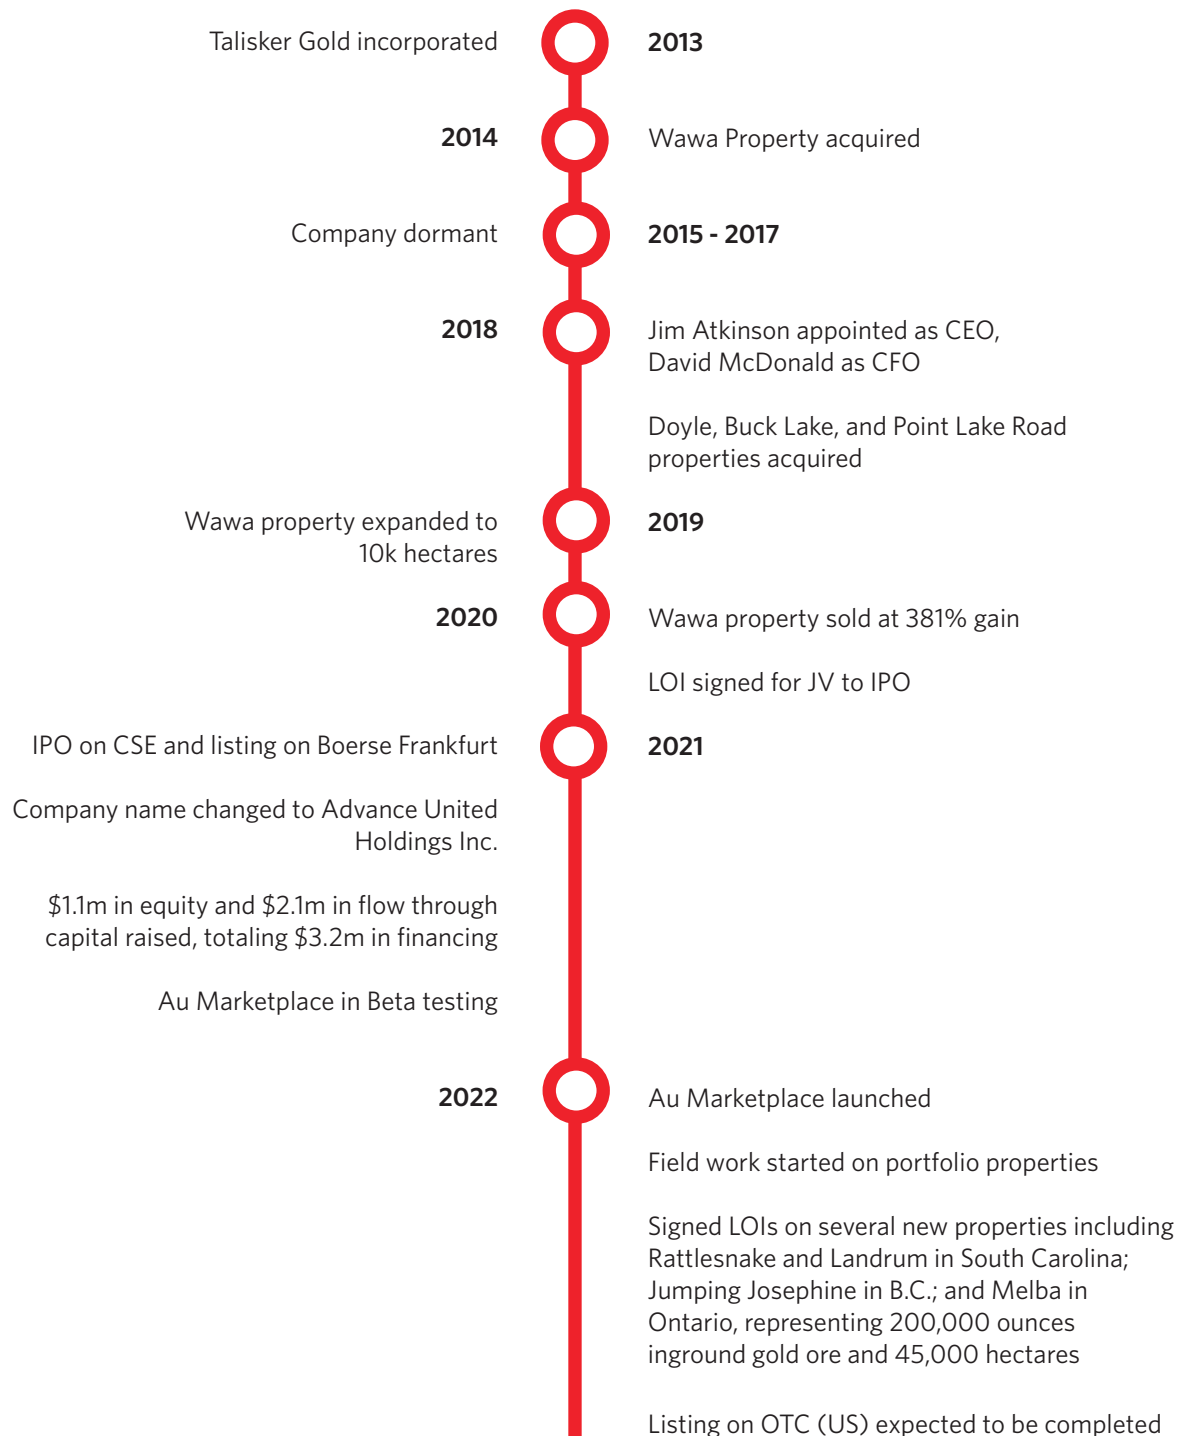

We are unlocking and creating a market for the world's dormant and uncharted mineral deposits for the benefit of our shareholders, stakeholders, partners, and the future.

Connects owners with buyers directly. Alternatively, it connects owners to potential partnerships with mid-tier and large mining companies for next-phase development and production.

2. Most mid-tier and large gold mining companies are in the business of development and production not prospecting and non-production value creation. Au has identified this gap as an opportunity being filled by our pipeline.

3. We don't mine. We hold and increase the value of portfolio properties until sold or partnered for development, increasing the value for shareholders while decreasing risk.

Milestones

2023 - 2024 target goals: 4 - 6 new properties added representing an additional estimated 250,000 ounces inground value to the portfolio, and to onboard up to 10% of junior mining deals to the Au Marketplace.

Bringing something new to the mining industry. The future.

There are few mining companies, if any, that have combined seasoned mining executives and engineers with experts in AI and open-source technology into their executive team. Advance United has done just that.

The leadership team has significant industry and recognizable experience working with notable major mining companies including Newmont, BHP, and Agnico Eagle. Added to this are industry experts in digital platform technology including open-source and AI.

With over one hundred years cumulative experience, our team has held positions as executives, directors, and advisors of publicly traded companies and are well versed in capital markets, investment banking, international mining projects, and financial and reporting requirements.

Management has a successful track record of bringing projects from start-up through to financing, and from exploration to production, and buy-outs from majors.

Management and Board of Directors

James R. Atkinson, M.Sc., P.Geo. CEO, Director

- > President and CEO of Talisker Gold, now Advance United
- > Exploration geologist and project manager with over 45-years' experience
- > VP, Exploration Manager with Newmont, Billiton and Agnico Eagle.
- > Recently part of the M&A team with American Silver
- > Designed and managed multimillion dollar programs discovering commodities
- > Managed teams of up to 100 staff in geophysical, geochemical, geological mapping, prospecting, and drilling programs
- > Negotiated option and purchase deals for mineral properties
- > Worked with investors to form and manage junior exploration companies

Kevin Wright, P.Eng. Director

- > An award-winning director for multinational marketing and advertising agencies with more than 20-years' experience
- > Developed successful marketing and business strategies for Party Poker, Sympatico MSN, IBM, CIBC, L'Oreal, Rogers, Famous Players, Beck's Beer, and Vonage to name a few
- > Has appeared on TV and lectured at

universities on marketing and business strategy

- > Served on the boards of public and private companies
- > Graduate of Queens University, member of the Professional Engineers of Ontario and a former diver in the Canadian Navy

David Boulette, B.Sc. Independent Director

- > 20-years' experience in software development
- > Founder of Eva Media, a publicly traded AI driven advertising platform
- > Formerly Venture Chief Technology Officer (CTO) of Boston Consulting Group Digital Ventures
- > Has worked with the cream of technology companies including RIM Blackberry, ATS Automation, and LiveHive Systems
- > Expertise in every important software language including NoSQL
- > AI pioneer and natural born innovator
- > Graduate of University of Waterloo with a BSc Computer Science

Management and Board of Directors

Walter Henry, BA, CFA, Independent Director

- > Experienced in the global resource industries and the North American and European finance markets (debt and equity) since 1991
- > Served as President, CEO, and Director of Frontline since 2009
- > Acted as VP Finance and CFO with public companies including Tiberon Minerals, Royal Nickel, Juno Special Situations, Satori Resources, and Alturas Minerals
- > Served with CIBC BNP Paribas, and PWC managing portfolios and project financings totaling over \$1 billion
- > Served as Director of Riverside Resources, Alturas Minerals, and Gold Candle
- > Has held the position of Chairman, Audit Committee Chairman, and Director roles with Alexandria Minerals, Alturas Minerals, Merrex Gold, Pltinex Inc.

David McDonald, Hons. B.Comm., CPA, CA, Controller

- > Serves as CFO of McLaren Resources Inc. and CFO and Director of Talisker Gold Corp.
- > 15-years' experience in the gold mining industry
- > Has served as CFO for a number of public and private junior mining companies
- > Received an Honours Bachelor of Commerce and earned his CA with Ernst & Young

David Beck Chief Financial Officer

- > Over 30-years financial, business operations, and capital markets experience
- > C-level executive with national financial institutions as financial analyst, institutional and proprietary trader, and investment banking
- > Established domain expert in analytics through his work as a top ranked technology research analyst in New York and Toronto
- > Security expertise develop through work with and investment in Cloakware (acquired by Irdeto) and Assurent Secure Technologies (acquired by Telus)

Management and Board of Directors

Peter Holmes
Chief Marketing Officer

- > 30-year history of finding unique insights that elevate a brand's reputation and as a result, profit
- > Appeared in Marketing Magazine's 'Power List' of the most influential people in Canadian communications. For several years he appeared at the top of Strategy Magazine's creative report card list of the best Creative Directors, Art Directors, and Writers, all at the same time
- > Work was curator selected for the inaugural and permanent advertising collection of The Royal Ontario Museum and included in The Canadian Graphic Design History Project
- > Founder of Zonetail (TSX: ZONE) a mobile platform for hotel guests and condominium residents

Kevin Glendenning
Chief Technology Officer

- > Over 20-years' experience in technology transformation, overseeing global IT operations in open-source information technology
- > President of Starnix Inc., a leading enterprise Linux and open-source solutions provider
- > Has overseen the development and deployment of technology applications for RIM Blackberry, AMD/ATI, Konica Minolta, and the Department of National Defence
- > Co-founded FOSter, a mentored Linux training company and title sponsor of Girls Learning Code
- > Involved with the exam and certification development at Linux Professional Institute, the world's largest vendor-neutral open-source certification body

Portfolio Properties

Most mid-tier and large gold mining companies are in the business of development and production, less so prospecting and property value creation. We've identified this gap as an opportunity. To this end we've acquired and are continuing to acquire a portfolio of undervalued, past producing gold bearing properties that meet our strict criteria and then increasing their value through the application of modern technology such as AI and instruments such as NI 43-101 reports, field work, and analysis.

The opportunity is in land banking a growing portfolio of gold bearing properties without the cost and risk of mining.

Each property is continuously evolved into peak value until it is sold or partnered for exploitation through mid-tier and major mining companies.

Existing gold resources

Evaluating criteria and value creation method.

We identify gold properties where we believe there is underdeveloped and undervalued potential. Properties with significant historical work and previous drill programs which were uneconomic at the time but have proven economic value at today's price of gold. We fund the development of re-working old data to create new NI 43-101's, thereby documenting their quantifiable resources and reserves using current standards, thus increasing their value. The cost of re-working old data with modern technology is significantly more cost effective and allows us to deliver the highest returns to our shareholders, in the shortest possible time frame.

We adhere to a highly disciplined approach, and a strict set of physical property criteria and historic work protocols in our selection process. We then utilize modern technology, software and hardware to identify and evaluate properties that we can acquire for a low-cost to develop, exploiting newly realized potential and proven value. Leveraging our gold exploration experience and knowledge, by using modern exploration techniques, and by tapping into our industry network, we arbitrage the value of previous work programs against exploration potential with pre-development dollars to unlock the value of these properties.

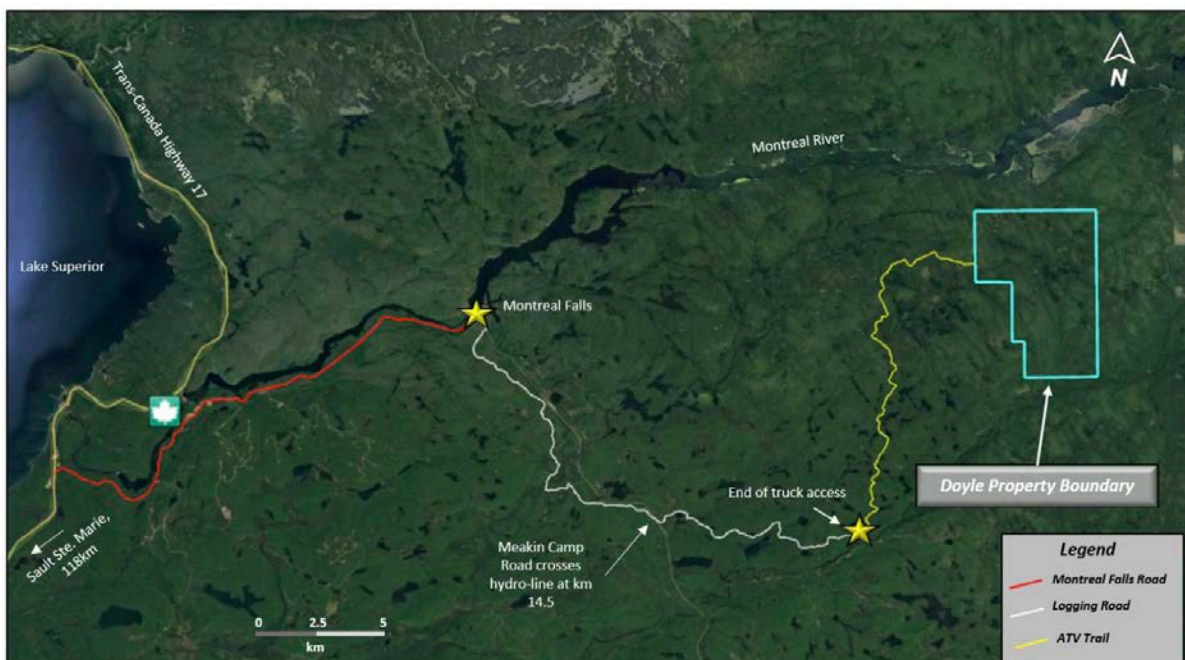

We intend to develop a portfolio of properties with similar attributes — North American based properties, formation type, historic gold resources and/or production. The Company's operations are in the most stable gold mining jurisdiction in the world, North America.

Doyle Property Overview

Located near Wawa, Ontario, the Doyle Property covers an area of over 2,365 hectares and is in a geological providential area and is an "orogenic gold deposit" type similar to the Timmin's Gold Camp and the Hemlo Gold Deposits which have produced over 21 million ounces of gold.

Focus of work is a model of similarity to the Hemlo Deposit. Recently acquired historic technical files (from Tri-Origin exploration), includes detailed drill logs for 37 drill holes (8,053 meters), Induced Polarization (IP) geophysical surveys, geological mapping, and sampling worth over \$1 million at current rates.

Notable, drill hole T94-22 intersected high grades of gold including 49.58 g/t gold over one meter and drill hole T95-34 intersected 17.49 g/t gold over one meter.

2022 Work and Historical Programs

2022 Work Program

Focus on the orogenic gold deposit types correlation. Drilling - 2021 work program generated new drill targets for 2022. Our main focus is drilling and to continue to build on previous work and further delineate the potential deposit thus increasing the value.

Current Work

Orix Geoscience of Toronto, Ontario has been contracted to complete the Compilation Report of historic documents and integration of recent 2021 work program using modern software and modelling techniques.

Favourable results of airborne geophysical surveys comprising VLF-EM and Magnetics, was completed by Terraquest Airborne Geophysics Ltd.

The interpretation report identified structural and geologic controls on gold mineralization on the Doyle Property, which can be utilized to focus and direct further exploration of the property.

There are two directions of structures on the Doyle Property which trend NNW-SSE and NW-SE with a dihedral angle of approximately 20 to 40 degrees between them. These can be identified on the regional

scale (Figure 1) and on the property scale (Figure 2). The shallow angle of intersection of the two main structural trends had been cited in the past as a favorable area for gold mineralization and concentration, and the curvilinear nature of the structures suggest they wrap around the Grey Owl Lake Pluton.

Interpretation of the VLF-EM data shows a resistivity high which is associated with the main gold occurrences found on surface which may be related to possible alteration by silica (quartz). In addition, the two divergent structural trends can be seen (Figure 3 and 4). Note that the known gold occurrences are associated with the edge of the high resistivity areas. These associations may indicate further areas of potential for gold mineralization on the Doyle Property.

The VLF-EM anomalies also follow the general structural trends. It is noted that the main gold mineralization discovered to date lie along VLF-EM anomalies pointing to the potential for other discoveries along these trends.

Favorable geophysical results correlate with known surface gold showings and present numerous high priority drill targets.

Doyle Property Structural Map

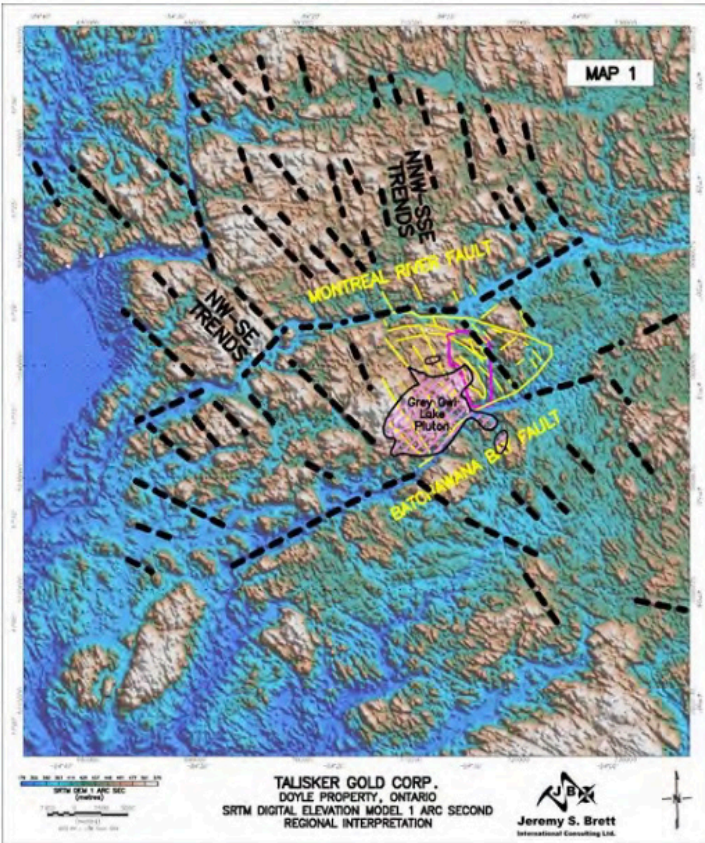

Figure 1: Regional Scale Structural Interpretation. The property is situated between the Regional Batchawana and Montreal River Fault systems and is influenced by the Grey Owl Lake Pluton.

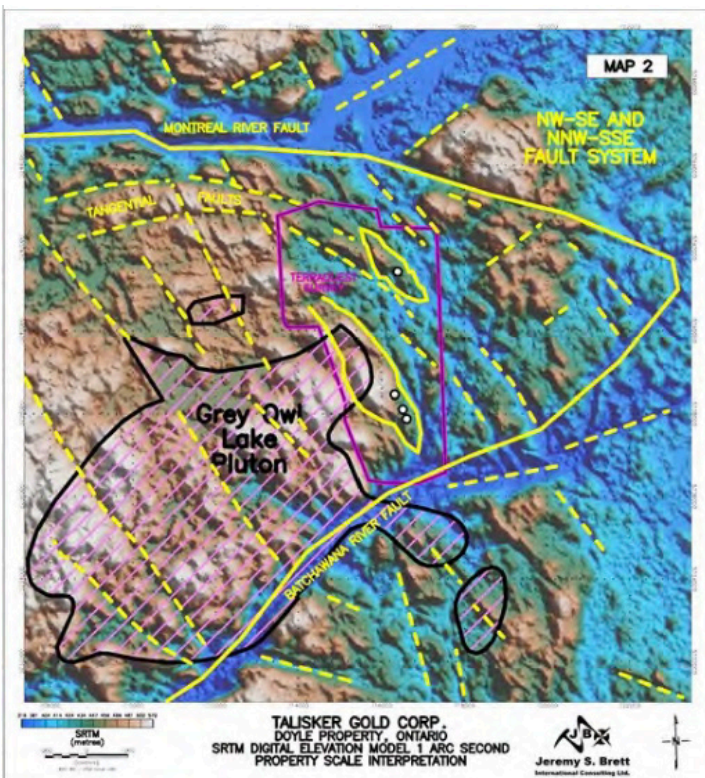

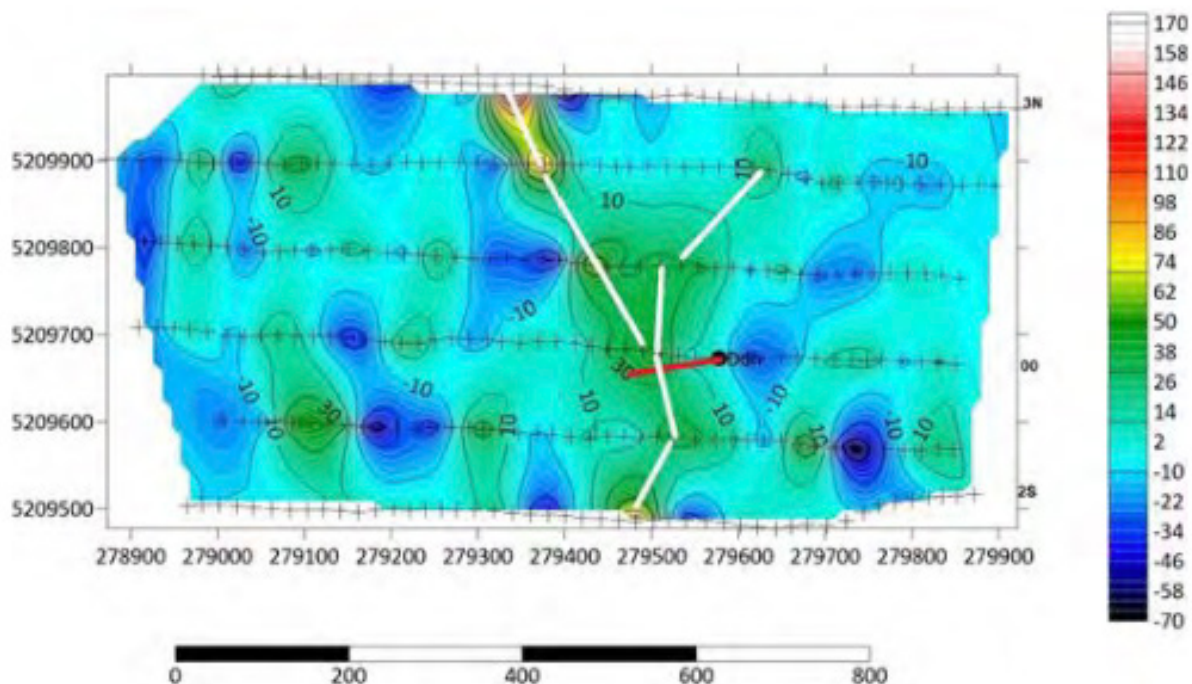

Figure 2: Property Scale Structural Interpretation Doyle Property. The property occurs in the wedge-shaped intersection of two regional structures. Note the curvilinear nature of many of the interpreted structures in the northern part of the property.

Buck Lake Property Overview

The Buck Lake Property is 4,100 acres in size and is in the Abitibi Subprovince, known to host many VMS type of deposits, including Glencore's Kid Creek Mine, the deepest base metal mine in the world.

Assessment of past work and government geological investigations indicates at least three (3) high potential zones which extend beyond the previously existing claims.

Previous drillhole on the original property intersected two zones of massive sulphide mineralization of 4.88 m and 4.72m in thickness containing copper mineralization.

Sulphide Zone: EM Map of Buck Lake showing the location of the recently identified sulphide zone as a strong anomaly and the location of the Noranda Drill Hole (in red) that intersected two massive sulphide zones with chalcopyrite.

Paint Lake Road Property Highlights

The Paint Lake Road JV Property is within the Wawa Abitibi Subprovince, prolifically known for its metal endowment. It has been estimated the Abitibi Subprovince has produced over 200 million ounces of gold and 400 million tonnes of base metal ore.

At 50km west of Wawa, Ontario, comprising 6 claim blocks totaling 3,610 hectares, and inside the Mishibishu Greenstone Belt (which hosts the Wesdome Mines - Eagle River Gold Mine and Mishi Open Pit) and the former Magnacon Mine and the Dorset Zone belonging to Angus Ventures (hosts noncompliant resources of 100,000 oz. Au) which we formerly developed and sold for a 381% ROI to Angus.

The belt has recently been consolidated and the Company's property is strategically located around the Mishi Open Pit and the former Magnacon Mines. Currently reviewing a VTEM survey over the property of the Paint Lake Road JV. The ground is adjacent to Wesdome's Open Pit gold mine and in the area of the property Advance United sold to Angus. A 50:50 Joint Venture with Frontline Gold where our technical staff have identified a number of high potential gold targets and Frontline Gold CEO is a director of Advance United.

Case Study With a 381% ROI

Talisker, now Advance United, had acquired the Wawa Gold Property for approximately \$250,000 and sold for approximately \$1,400,000 to Angus.

In 2014, a predecessor company acquired the Dorset Property in the Wawa Area for \$200,000 and 2 million shares (valued at \$0.03). The property was less than 500 Ha but had a small (non-NI43-101 compliant resource of approximately 200,000 ounces of gold.

In 2018 the new management realized that the property was too small to be of interest and set about expanding the holdings.

By the end of 2018, deals had been completed to expand the property to over 10,000 Ha.

Negotiations began to sell or option the property.

Angus Ventures (now Angus Gold) approached Talisker to purchase the

property in early 2019.

In late 2019, Angus Bought Talisker Gold's Wawa Property for \$600,000 cash and 4M Shares (trading for approximately \$0.20 at the time) equal to approximately \$1.4 Million.

Actual sale of shares was 2,000,000 at \$0.30, for a total profit of \$600,000. 175,000 shares were used as debt settlement, and the remaining 1,825,000 shares were dividends to existing shareholders at \$0.74 (representing \$1,350,500). The Wawa deal culminated in a ROI of 381%.

Talisker used the cash and the sale of some of the shares to eliminate the accumulated liabilities which resulted in a strong balance sheet with cash on hand and no liabilities.

Au Marketplace. An online platform connecting mineral property owners with investors, developers, and producers.

There are many past producing properties bearing precious metals, base metals and rare earth deposits. Property owners seek a solution to the problem of having a property with an out-of-date or unestablished value and not having the means to move it forward. Without help, their hopes and dreams are dead in the ground. These are unloved projects that have need of analysis, value creation, financing, marketing exposure, and exploitation.

Au Marketplace, our online platform provides these owners with a means to increase their property's value through the application of AI driven, open-source technology and then provides the marketing muscle to connect owners with buyers directly. Alternatively, it connects owners to potential partnerships with mid-tier and major mining companies for next-phase development and production.

In short, similar to Airbnb and Uber, Au Marketplace presents a platform economy putting mineral property owners together with buyers.

Value and Revenue Strategy

We are just as much financiers and accountants, as we are geologists and technologists. Not only is it important for us to identify properties with current market potential, but through earn-in, joint ventures, partnerships, careful calculation of the upside value of deploying modern exploration techniques, and modeling we can recognize the significant upside potential of our share price.

Our revenue and value strategy is to generate returns by acquiring promising projects and properties and issuing stock and/or dividends to pay partners and investors, increasing the value of stock for shareholders, and creating a portfolio with significant resources and reserves.

Our portfolio strategy is to re-package properties to present to potential buyers and developers including mid-tier gold exploration companies and large gold mining and production companies for next-phase development and production.

Our Marketplace strategy is to earn a fair percentage on transactions taking place through the platform.

The Canadian Gold Market*

Canada is the 5th largest gold producer in the world.

Gold is Canada's most valuable mined mineral, with a production value of \$9.6 billion and gold exports of over \$17.3 billion.

Ontario and Quebec together account for more than 75% of mined gold production in Canada. Ontario is the largest gold-producing region in Canada with a total of 20 gold mines, out of a total of 31 metal mines.

Canadian mines produced an estimated 183 tonnes of gold in 2019, which represents an 88% increase over production in 2009.

*Source: Most recent data a/o Jan. 20, 2021 available from Government of Canada.

The Global Gold Market

Gold was one of the best performing major assets of 2021 and the price of gold reached its all-time historic high.

Historical gold drivers including ultralow interest rates, multitrillion-dollar government deficits, a weak US dollar creating inflationary pressures are all key factors which drive the price of gold up.

Coronavirus and its pervasive effects across worldwide markets prolonged safe haven demand. Risk and uncertainty, and market downturns, often boost investment demand for gold as a safe haven.

Gold also had one of the lowest drawdowns during the year, helping investors limit losses and manage volatility risk in their portfolios. It's a strategic and tactical investment.

Our outlook for gold is very bullish, we believe investment demand will remain well supported while gold consumption should benefit from the economic recovery.

Condensed Interim Consolidated Statements of Financial Position As at March 31, 2022 (Expressed in Canadian Dollars)

Investment Highlights

Au Portfolio. A growing land bank of gold-bearing properties with historic resources and potential to expand.

Au Marketplace. An industry first online platform connecting owners of precious metals, base metals, and rare earth deposits with investors, developers, and producers.

A growing property pipeline.

Cash in the bank.

Dual listing on CSE: AUHI and Boerse Frankfurt: 910.

No debt or liabilities.

Experienced management with successful track record.

43,981,406 shares issued.

Ability to raise additional capital through, flow through, trade, and institutional road shows.
